

Visual Stimuli

Presentation protocol

Task

please select which circular plane is more slanted to you?

if the first one ---> LEFT key
if the second one ---> RIGHT key

Scripts to run

On MATLAB command line,

```
>> run_exp('your_initial', 1, 1)
>> run_exp('your_initial', 2, 1)
>> run_exp('your_initial', 3, 1)
>> run_exp('your_initial', 4, 1)
```

For the second session,

```
>> run_exp('your_initial', 1, 2)
>> run_exp('your_initial', 2, 2)
>> run_exp('your_initial', 3, 2)
>> run_exp('your_initial', 4, 2)
```

Note:

The first presentation would be slightly strange, but please ignore and continue to response

Each run will take about 10 mins.

If you do not press keys, stimulus presentation will stop, waiting for your response. During this period, you can take a rest anytime as you like.
